

EM-6992 Hand Held Probe Set

Product specifications are subject to change without notice.

Description

The EM-6992 Hand Held Probe Set is designed to assist in pinpointing the specific source of emissions during the diagnostic testing phase of an EMI compliance investigation. A selection of probes of varying sensitivities is provided for both E-field and H-field analysis up to 1000 MHz.

Applications

When used with any 50 ohm measuring instrument the EM-6992 set allows for easy identification of emission sources.

Configuration

All probes supplied with BNC connector and custom carrying case.
